

55 Cancri e

Planet information :

Planet type : Super Earth

Constellation : Cancer

Distance : 40 light years

Temperature : 1700°C

Mass : 8.6 M \oplus

Observation speed : real time

Description :

The planet has around thousands degrees of Kelvin or in Celcius, so this planet is incredibly hot and has a very strong gravitational field. This planet has a lot of lava which make the surface of the planet very hot and which make it possible that the atmosphere contains metal-rock from the surface and rain silicates
