

# Osiris

---

Planet information :

Planet type : Hot Jupiter

Constellation : Pegasus

Distance : 154 light years

Temperature : 1130°C

Mass : 226  $M_{\oplus}$

Observation speed : real time

Description :

Known as HD209458b, the planet has a very strong wind, going from the west to east. The wind's speed is almost 5 km per seconds, which is about ten times faster than concorde.

Because of the temperature, it is really possible for it to rain molten iron, silicates, or even glass
