

Kepler-62e

Planet information :

Planet type : Super Earth

Constellation : Lyra

Distance : 1200 light years

Temperature : -3°C

Mass : $4,5 M_{\oplus}$

Observation speed : real time

Description :

The super earth is a type of planet which have thicker atmosphere and stronger gravity than Earth.

This type of form is really common in the galaxy which size is around neptune or earth.

This planet has a huge ocean in which because of the pressure it makes the waves really high.

(known as Water World)
