

WASP-121b

Planet information :

Planet type : Hot Jupiter

Constellation : Puppis

Distance : 880 light years

Temperature : 2500°C

Mass : 376 M_{\oplus}

Observation speed : x 5000

Description :

Hot jupiter is gas giant exoplanet, but it much much closer orbit to its star

When day time, the temperature could reach thousand of degrees Kelvin which cause a lot of contrast between day and night time in temperature.
